RSS Feeds

If you would like to be informed about updates to BSI content, please subscribe to one of our RSS feeds.

To use RSS feeds, you need a *news aggregator* (also called a *feed reader* or *RSS aggregator*). A news aggregator can be a program or an extension to your Web browser or email program, and there are many of them available. Please refer to resources elsewhere on the Web for information about how to use an aggregator.

The following apply to all feeds:

*   The feeds include the documents modified in the last 14 days, with a maximum of 20 items.
*   The feeds are cached for 20 minutes, so changes can take up to 20 minutes to show up in the feed.
*   By default, the feeds are generated for the "guest" user. To specify another user, append **?login=...&password=...** to the URL.

Feeds Supported

This server supports the following RSS feeds:

Minimal

The minimal feed includes only the name of the documents with a recently published live version.

*   https://buildsecurityin.us-cert.gov/bsi/ext/rss/minimal-rss.xml

Some problems have been reported using the minimal feed with Google Reader - links have "..uscert.gov" rather than "...us-cert.gov". The links for the Normal feed to Google Reader are correct.

Normal

The normal feed includes the whole rendered content of the documents with a recently published live version.

*   https://buildsecurityin.us-cert.gov/bsi/ext/rss/normal-rss.xml

Reporting Problems

Report problems with RSS feeds to bsi-comments[at]sei.cmu.edu.
